-----------------------------	----

General information

DELIVERY

Please deliver the advertising materials at least 5 working days before the start of the campaign by e-mail to the following addresses depending on the object to be occupied:

- connect professional: DISPO.connectProfessional@wekanet.de

So that we can assign the ad media, please provide the customer name, campaign name, campaign period, target URL and your ad management contact.

When changing advertising media, please let us know which motif and placement it is. Please adhere to the maximum file and pixel sizes of the different advertising formats. All special advertising forms that are delivered as a redirect must not be positioned "absolutely".

TECHNICAL CONTROL

Upon delivery, the advertising materials are subjected to an inspection to ensure that they meet the technical specifications. Unfortunately, we have to reject advertising media that do not meet these specifications and ask for revision. Despite checking, problems may occur even after the campaign or flight has started. We reserve the right to exclude advertising media in whole or in part from broadcasting if:

- there are massive complaints from the user (user) after the start of the campaign
- it subsequently turns out that the advertising medium interferes with the performance of the site or the user's computer
- an external advertising medium was subsequently changed without consultation and does not meet the specifications
- the advertising material misleads the viewer/user

TRACKINGS

External tracking pixels, which analyze and record user behavior and, if necessary, match it through a downstream database on the customer side, must comply with the guidelines of the EU General Data Protection Regulation (GDPR) and, in addition, the provider must be represented as a certified partner on our data protection page. (Post-bid blocking pixels are not allowed).

General information

COUNTING DEVIATIONS

Counting deviations in delivered Ad Impressions caused by selective filtering of an external tracking pixel (e.g. Ad Verification Pixel), unless they can be proven by a validated data basis, will not be recognized by WEKA Media Publishing GmbH or settled in favor of WEKA Media Publishing GmbH without prior agreement.

MOTIVE

Standard is one motif per booked placement. In the case of motif split, a limit of max. three motifs per placement must be taken into account and one motif change per week is permitted for physical delivery.

HTML ADVERTISING MEDIA

To ensure that no files are lost, we ask you to deliver all images and HTML fragments in a ZIP file.

HTML ad media must be UTF-8 compatible.

In the case of physical delivery, all elements of the advertising material must be compressed and relatively linked in a zip file, including an index.html file as the starting point and all embedded scripts. Excepted are externally loaded libraries, videos and fonts.

Please follow the [specifications of google AD Manager](#) when creating html5 ad media.

General information

SOUND

Advertising media may only start with the sound effect deactivated. The sound may only be activated by a clear user action (by click or mouse-over).

The sound must be played only once and must not repeat (no loop).

There must be a clearly visible option on the advertising material to deactivate the sound, e.g. marked by the words "sound on/off", "sound on/off" or a stylized loudspeaker.

We reserve the right to reject advertising material with "aggressive" sounds or inappropriate volume.

If the sound is subsequently downloaded from the advertising material, it must be ensured that the reloading process only starts when the page is completely built up ("Polite Download"). It is usually sufficient to delay the reloading process by approx. 5-10 seconds.

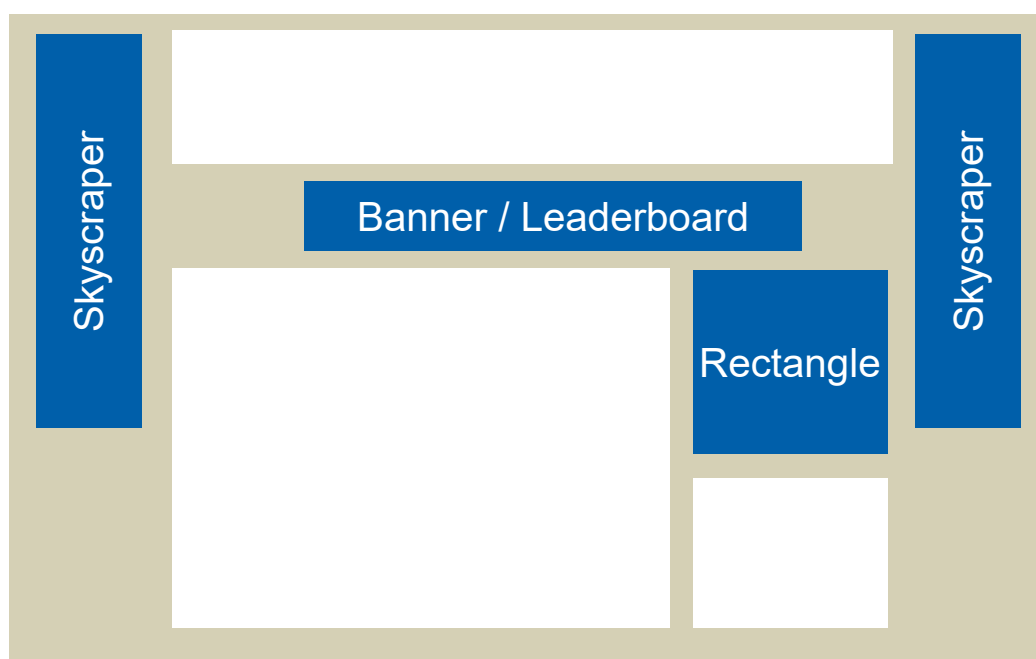

If you want to use sound effects/music in your advertising material, please take into account that this is handled differently by the various advertising media (publishers). Please ask our SalesTeam for details.

PRODUCTION

The sizes are based on the IAB standard advertising formats. Modified specific sizes can be placed after consultation with WEKA Media Publishing's ad management.

The advertising media must be optimized with regard to the specified file sizes. It is advisable to use scalable vector graphics.

Standard forms of advertising

Desktop	
File weight	Max. 40 KB / 200 KB HTML5 Redirect Initialload, Subload max. 2 MB
Format	JPG/PNG/GIF (Link required) / HTML5
